

REGENERATION AND SERVICE

The extensive services of Evoqua Water Technologies complete the range of water treatment systems. The accompanying service applies during the entire life cycle and even beyond in case of modernization/optimization. Inquire about our services:

- On-site service
- Repairs/maintenance
- Technical advice
- Replacement part supply with original spare parts
- Safety audits through "qualified persons"
- System qualification (DQ IQ OQ PQ)

CONNECTION THROUGH TRADITION

EVOQUA COUNTS ON RENOWNED BRANDS

From SG Water to Evoqua. We have been a renowned brand for water treatment worldwide for more than 40 years. Our history can be found in many companies because the equipment is safe, proven and durable. This tradition is also carried forward with new products under the Evoqua Water Technologies roof. You can count on that.

Evoqua Water Technologies is a global leader in providing products and services for water treatment. The offer contains processes for water treatment and resin regeneration corresponding service.

Its core competencies include water treatment systems and accessories as well as the customer-specific project planning. Whether reverse osmosis, pure or ultrapure water, our systems are tailored to laboratory and industrial applications. (ASTM Type III - I)

EVOQUA PRODUCTS: THE WHOLE RANGE OF WATER TREATMENT

ALL SYSTEMS AND SUPPLIES AT A GLANCE

1 ION EXCHANGER

Ion exchangers filled with, e.g., mixed bed resin are available in 7 sizes; from SG 2000 with 13 liters of resin to SG 15000 with 100 liters of resin. The cartridges are available with screw terminals 3/4" / 1 1/4" external thread and one quick coupling connection in DN 12. An extensive range of supplies like conductivity meters, LF electrodes, tubing sets and much more is available.

2 LABORATORY WATER TREATMENT

You can produce ultrapure water according to ASTM type I / ISO 3696 with 18.2 MΩ, which equals 0.055 µS/cm. The systems can be connected with demineralized water or directly to the drinking water pipeline. With the extension levels in the UV and UV/UF/TM versions, we meet the requirements of all applications in modern laboratories.

3 INDUSTRIAL SYSTEMS

Even the industry has high water quality demands. In central water treatment systems, our reverse osmosis systems are used, also with EDI technology. Cabinet and open frame systems of type Protegra are our standard with a performance capacity from 200 to 3000 l/h.

4 PROJECTS

Projects are one of our strengths. Not only do we tailor laboratory systems to your needs, but we also offer tailor-made and project-specific large-scale systems, for example for industrial purposes. It is also possible to supply systems bigger than 3 m³.

5 SUPPLIES

A series of components are available to our system technologies. Softener, storage tanks, pressure boosting systems or UV disinfection facilities help to complete the systems.

6 REGENERATION AND SERVICE

If you use mixed bed ion exchangers, we are your reliable partner in regenerating your cartridges. We can also assist you nationwide with our re-fillers. If you have a problem with a system, you can get in touch with our service technicians on the phone. Our service technicians are at your disposal with fully equipped vehicles.

A
CENTRAL WATER SUPPLY
 We plan your central water treatment system, adjusted to your individual requirements.

B
ION EXCHANGER
 Compact and cost effective solution for low consumption. Available in various sizes. Ion exchanger to supply dishwashers and autoclaves.

D
LABORATORY WATER SYSTEMS FOR HIGH DEMANDS
 The Ultra Clear® series from Evoqua is the solution for highest demands in quality and comfort. Many possibilities, one system.

C
COST EFFECTIVE LABORATORY WATER SYSTEMS
 Our LaboStar® series is the cost effective yet highly efficient solution for your lab. Pure or ultrapure water systems with type I-III water qualities according to ASTM.
