## FOOD SAMPLING – Solid substances and bulk goods

**Do you want to know what's on your plate?**

So do your customers!  
Food scandals show us almost daily that food sampling is not considered sufficiently in many enterprises, particularly when inspecting incoming goods. Samples must be taken regularly, because products can only be as good as the raw materials they are made of.

You can carry out very precise material analyses using the most modern techniques. However, if a mistake is made in sampling then even these modern techniques are useless because the initial sampling error is carried through all the steps of the analysis and incorrect results will be obtained. Thus is the conclusion:

**Take samples – but do it right!**

### Zone samplers | for all kinds of bulk goods

All-layer sampler, with open inner tube, no separate chambers, and large sampling volume. For all-layer samples through all the layers of the sample.

► 25 mm Ø

Multi sampler with several closed chambers, for multi point sampling from several predetermined sampling depths.

► 25 mm Ø

Uno sampler made of stainless steel V4A/PTFE with a closed sample chamber for point sampling from a predetermined sampling depth.

► 25 mm Ø

#### All-layer sampler

Material	Total length cm	Insertion depth mm	No. of openings	Chamber volume ml	Price €	Item no.

device with 3 funnels	V2A	100				5317-0030

## Tubus

Sampler for pourable bulk goods up to approx. 1 cm in diameter. This makes it possible, for example, to remove hazel nuts, blends of tea, grain or similar items from large sacks.

- ▶ Also for coarse-grained bulk goods
- ▶ Made of stainless steel V4A (1.4404)
- ▶ Special geometry of the tip

Corresponds to ISTA standard for seed lengths of 10 mm (wheat, oats) and 5 mm (flax, vetches).

Tubus

80	40				5382-0080			

## Milky | acc. to EN ISO 707

Universal powder and granules sampler made of stainless steel V4A.

Developed initially for milk powder samples, conforms to standards of DIN and IDF (International Dairy Federation).

The collector is inserted into bags or casks and the sample is removed using a semi-circular profile lance.

close-it and close-it food & pharma ensure tight sealing of punctured sacks/bags. See following page.

150				5321-0300				

## QuickPicker | collects samples quickly and channels them directly into the sampling bottle

The core sampler is particularly suitable in the event that bulk goods are taken directly from sacks or bags and have to be filled into the original sampling bottle directly. QuickPicker is uncomplicated in its use and cleaning.

No undercuts or edges mean no sample residues which could falsify subsequent samples. It is therefore ideal for quality control.

QuickPicker is delivered complete with two 250 ml PE sample bottles and with a cleaning brush.

- ▶ Insertion depth 30 cm, diameter 25 mm
- ▶ Made of stainless steel (1.4404) or PP transparent, sterilisable, cost-effective
- ▶ Removable tip, easy cleaning

Corresponds to ISTA standard for seed lengths of 10 mm (wheat, oats) and 5 mm (flax, vetches).

## QualiRod conical/cylindrical

**Conical hand-drill**, conically shaped, with sharp cutting edges and a solid handle. Ideal for cutting out samples for quality control from soft, paste-like substances (cheese, butter, clay, soap, wax, etc.).

**Cylindrical hollow drill** with a sharp cutting edge, can easily be driven into paste-like and semi-solid substances. The samples cut out are subsequently removed with the appropriate push-rod ejector. Total length 260 mm. Inner Ø 8 mm, outer Ø 10 mm.

- ▶ Stainless steel V2A (1.4301)
- ▶ Sterilisable

## close-it food & pharma

In response to numerous requests from our customers, we have now developed close-it food & pharma, a control seal with an adhesive approved for use with foodstuffs. The strength of the adhesive is almost as powerful as that of the original, the close-it from Bürkle, proven millions of times.

## close-it<sup>tape</sup> food & pharma

Besides the individually detachable close-it and close-it food & pharma closure labels, our repeatedly tested and proven control seal is now also available on a continuous roller. For universal use, we have kept the adhesive tape close-it<sup>tape</sup> food & pharma in white with tear-off lines.

## All-layer-scratcher

The scratcher is a special sampler for powders and granules that do not flow freely. The sample is transferred to the closable inner tube using a scraper. Sliding PTFE separators are used to divide the inner tube into different zones. The separators also prevent the sample from being mixed.

- For caked bulked goods
- Zones can be varied due to moveable PTFE separators.
- Made of stainless steel V4A (1.4404) and PTFE

### All-layer-scratcher

Dia. mm	Length mm	Price €	Item no.
25	1000		5351-1000

## FoodScoop

Very stable hand scoop for various applications, particularly suited for the food industry. Seamless connection of scoop and hollow handle, therefore without crevices and edges. Especially smooth, highly polished surface.

- Especially sturdy model
- Stainless steel V2A (1.4301)
- With handy suspension eyelet

### FoodScoop

500	350	220 x 130				5371-0500

## SiloDrill | for silo sampling

If bulk goods are transported over long distances (in trucks, railway goods wagons), separation may occur.

Taking the sample just from the surface therefore leads to the wrong result. Representative samples from all layers of the silo can be taken with the SiloDrill.

The SiloDrill fits through all standard openings with its diameter of 90 mm.

- Made of stainless steel V2A (1.4301) or aluminium

SiloDrill						
Material	Total length cm	Spiral screw dia. mm	Chamber dia. mm	Volume ml	Price €	Item no.
Aluminium	150	90	40	400		5301-1000
V2A	150	90	40	400		5301-2000

## SiloPicker

The SiloPicker is ideal for taking bulk goods samples from silos. Using the extension rods, samples can be taken from depths down to 3.5 m. The insertion depth depends on the density of the bulk goods.

- Stainless steel V4A (1.4404)

1. Insert SiloPicker into the bulk goods.  
When this is done, the closure sleeve automatically closes the collection container.
2. When the sampling depth has been reached, the closure sleeve is opened by gently pulling back the SiloPicker, the sampling container is filled.
3. Pull out the SiloPicker and empty it.

## Ice borer | for deep-frozen and semi-solid substances

For deep-frozen products in the food industry and semi-solid substances. The sharp sawing crown of the very robust hollow borer rapidly cuts into the sample.

A cylindrical sample (cross-sectional sample) of up to 20 cm can be cut out.

Ice borer consisting of three parts: Borer,

borer head for use in conventional drills and rod for pressing the cylindrical sample out of the borer head.

- Stainless steel V4A (1.4404)
- Sterilisable
- 20 cm boring depth

Ice borer

② 50	54	200		5323-2010

## BeefSteaker | as per HACCP

For taking bacteriological samples from the surfaces of dead animals in slaughterhouses and in butchers' shops (cattle, pigs, sheep, goats and horses). The BeefSteaker is used to cut out a 25 mm round sample from the animal's skin. The stainless steel (1.4404) cutter allows the sample to be cut out easily. The BeefSteaker can also be used for other sampling purposes (histology, medicine, food and semi-luxury articles, cheese factories, agriculture).

The BeefSteaker can be steam-sterilised or flamed. A hole in the crown prevents air compression and is used for ejecting the sample.
